A live audio webcast of the presentation will be available [here](#) and on the Events and Presentations section of the Company's website.
- **Cantor Global Healthcare Conference** on Thursday, September 28. Ron Peck, M.D., Chief Medical Officer, and Sean Cassidy, Chief Financial Officer, will participate in a fireside chat. A live audio webcast of the presentation will be available [here](#) and on the Events and Presentations section of the Company's website.

About Arvinas

Arvinas is a clinical-stage biotechnology company dedicated to improving the lives of patients suffering from debilitating and life-threatening diseases through the discovery, development, and commercialization of therapies that degrade disease-causing proteins. Arvinas uses its proprietary PROTAC[®] Discovery Engine platform to engineer proteolysis targeting chimeras, or PROTAC targeted protein degraders, that are designed to harness the body's own natural protein disposal system to selectively and efficiently degrade and remove disease-causing proteins. In addition to its robust preclinical pipeline of PROTAC protein degraders against validated and "undruggable" targets, the company has three investigational clinical-stage programs: bavdegalutamide and ARV-766 for the treatment of men with metastatic castration-resistant prostate cancer; and vepdegestrant (ARV-471) for the treatment of patients with locally advanced or metastatic ER+/HER2- breast cancer.
