 - Noah Berkowitz, M.D., Ph.D., Chief Medical Officer, and Randy Teel, Ph.D., Chief Business Officer, will participate in a fireside chat. A live audio webcast of the presentation will be available [here](#) and on the Events and Presentations section of the Company's website.
- **UBS Spring Biotech Conferences on Tuesday, May 21.**
 - Noah Berkowitz, M.D., Ph.D., Chief Medical Officer, and Randy Teel, Ph.D., Chief Business Officer, will participate in investor 1x1 meetings.

About Arvinas

Arvinas is a clinical-stage biotechnology company dedicated to improving the lives of patients suffering from debilitating and life-threatening diseases through the discovery, development, and commercialization of therapies that degrade disease-causing proteins. Arvinas uses its proprietary PROTAC[®] Discovery Engine platform to engineer proteolysis targeting chimeras, or PROTAC[®] targeted protein degraders, that are designed to harness the body's own natural protein disposal system to selectively and efficiently degrade and remove disease-causing proteins. In addition to its robust preclinical pipeline of PROTAC protein degraders against validated and "undruggable" targets, the company has four investigational clinical-stage programs: vepdegestrant (ARV-471) for the treatment of patients with locally advanced or metastatic ER+/HER2- breast cancer; ARV-766 and bavdegalutamide for the treatment of men with metastatic castration-resistant prostate cancer; and ARV-102 for the treatment of patients with neurodegenerative disorders.
