

# **Arvinas to Participate in Upcoming Virtual Investor Conferences**

September 1, 2021

NEW HAVEN, Conn., Sept. 01, 2021 (GLOBE NEWSWIRE) -- Arvinas, Inc. (Nasdaq: ARVN), a clinical-stage biotechnology company creating a new class of drugs based on targeted protein degradation, today announced that it will participate in two upcoming virtual investor conferences:

Citi 16th Annual BioPharma Virtual Conference on Thursday, September 9, 2021. John Houston, Ph.D., President and Chief Executive Officer, and Ron Peck, M.D., Chief Medical Officer, will participate in a fireside chat at 9:45 a.m. ET. A live audio webcast of the presentation will be available <a href="here">here</a> and on the Events + Presentations section of the Company's website.

**2021 Cantor Virtual Global Healthcare Conference** on Tuesday, September 28, 2021. Sean Cassidy, Chief Financial Officer, and Ian Taylor, Ph.D., Chief Scientific Officer, will participate in a fireside chat at 9:20 a.m. ET. A live audio webcast of the presentation will be available <a href="here">here</a> and on the Events + Presentations section of the Company's website.

## **About Arvinas**

Arvinas is a clinical-stage biopharmaceutical company dedicated to improving the lives of patients suffering from debilitating and life-threatening diseases through the discovery, development, and commercialization of therapies that degrade disease-causing proteins. Arvinas uses its proprietary PROTAC® Discovery Engine platform to engineer proteolysis targeting chimeras, or PROTAC® targeted protein degraders, that are designed to harness the body's own natural protein disposal system to selectively and efficiently degrade and remove disease-causing proteins. In addition to its robust preclinical pipeline of PROTAC® protein degraders against validated and "undruggable" targets, the company has three clinical-stage programs: ARV-110 and ARV-766 for the treatment of men with metastatic castrate-resistant prostate cancer; and ARV-471 for the treatment of patients with locally advanced or metastatic ER+/HER2- breast cancer.
