

Arvinas to Present at Upcoming Investor Conferences

February 3, 2022

NEW HAVEN, Conn., Feb. 03, 2022 (GLOBE NEWSWIRE) -- Arvinas, Inc. (Nasdaq: ARVN), a clinical-stage biotechnology company creating a new class of drugs based on targeted protein degradation, today announced that it will participate in two upcoming virtual investor conferences:

Guggenheim Oncology Conference on Thursday, February 10. Ian Taylor, Ph.D., Chief Scientific Officer, will participate in a fireside chat. A live audio webcast of the presentation will be available [here](#) and on the Events + Presentations section of the Company's website.

2022 SVB Leerink Global Healthcare Conference on Friday, February 18. John Houston, Ph.D., President and Chief Executive Officer, will participate in a fireside chat. A live audio webcast of the presentation will be available [here](#) and on the Events + Presentations section of the Company's website.

About Arvinas

Arvinas is a clinical-stage biopharmaceutical company dedicated to improving the lives of patients suffering from debilitating and life-threatening diseases through the discovery, development, and commercialization of therapies that degrade disease-causing proteins. Arvinas uses its proprietary PROTAC[®] Discovery Engine platform to engineer proteolysis targeting chimeras, or PROTAC[®] targeted protein degraders, that are designed to harness the body's own natural protein disposal system to selectively and efficiently degrade and remove disease-causing proteins. In addition to its robust preclinical pipeline of PROTAC[®] protein degraders against validated and "undruggable" targets, the company has three clinical-stage programs: ARV-110 and ARV-766 for the treatment of men with metastatic castrate-resistant prostate cancer; and ARV-471 for the treatment of patients with locally advanced or metastatic ER+/HER2- breast cancer.
